

I am a big supporter of XM Satellite radio. Because I live in Los Angeles having traffic reports available 24/7 is essential for me as I drive 30 miles to work each day. Driving and traffic conditions is a part of the LA life style and there is not one radio station in LA that can support the vital need to have a traffic report as soon as you turn on your car radio like XM. XM has saved me time and frustration in driving to work each day. I am asking you to please support XM. I absolutely cannot survive my commute without it.

Regards,

Norma Hans
